

Yuko After Care Products

Recommended aftercare products

For hair straightened by the Yuko method, these products are recommended:

KokoroG shampoo

A regular-use shampoo with hydrolysed silk, keratin and sericin, which strengthens the hair and leaves it soft and smooth.

Alga KokoroG Treatment

A regular-use intensive conditioner with keratin, sericin, algae, collagen, Vitamin E and amino acids that detangles, deeply moisturises and leaves the hair soft, smooth and strong.

Repair Through

A leave-in conditioning spray with amino acids. This helps to prevent split ends and protects hair from damage caused by blow-drying and brushing. Spray on wet or dry hair. For optimum results, blow-dry the hair after each application.
